Fabulous Four

REPTILE sunglasses balances style, comfort, function, and state-of-the-art optics, to create a high-definition polarized collection. Described as “The Micro-Brewery of Polarized Sunglasses,” the collection focuses on thoughtful details in the design. Reptile produces the AMP (Advanced Multi Protection) lens system in TPC-X (glass) or Polynium lenses that provide HEV protection and unmatched high-definition visual performance. The fall 2010 collection consists of 34 styles whose dominant theme is updated Retro with vintage five- and seven-barrel riveted hinges and mitered temples, women’s fashion with exclusive colors of zyl, as well as modern aviator metal wraps. They are also available without sunlenses for prescription usage.
